Spark Tutoring Full Stack Developer - Task Tracker Challenge

Objective:

Create a simple team task tracker that allows users to:

- Add tasks
- Edit tasks
- Assign tasks to team members
- Mark tasks as complete

You can use any tech stack you're comfortable with. We're primarily interested in how you think and approach the problem.

Required Features:

- **Task Management**
  - Add a task (title and description)
  - Edit a task
  - Mark a task as complete/incomplete
- **Assignment**
  - Assign a task to a team member (you can hard-code a few example users)
- **Task List View**
  - Display tasks with: title, status (complete/incomplete), assigned user
- **Optional Bonus Features (choose any, not required)**
  - Filter or search tasks
  - Due dates
  - Priority levels
  - Simple user login or session tracking

What to Submit:

- A Loom video (2–5 minutes) walking us through what you built and how you approached it
- A link to your GitHub repository or a zip file of your code
- (Optional) A README file explaining anything else you'd like us to know

Deadline:
Please submit your project within 48 hours of receiving the task.
